

COMPANY PROFILE

Magritek GmbH

Philipsstrasse 8, Aachen 52068, Germany
 Tel: +49 241 92787270
 sales@magritek.com, www.magritek.com

Founded in 2004, Magritek is the global leader in manufacturing cryogen-free benchtop Nuclear Magnetic Resonance (NMR) spectrometers for the analytical instrument market. Magritek's revolutionary 80MHz, 60MHz and 43MHz Spinsolve family of benchtop NMR models offer the highest sensitivity and resolution available in the market. These portable systems are robust and easy to use, allowing modern NMR methods to be performed on the chemistry lab bench or inside the fume hood next to a reactor. Spinsolve NMR spectrometers are used daily by scientists in research labs to quantify and identify sample compositions, confirm reaction completions and elucidate unknown molecular structures.

Magritek customers include the top universities and chemistry research groups in the world, as well as lead-

ing companies in the pharmaceutical, fine chemical, petrochemical, forensics, food and polymer industries, amongst others. Decades of world-class research by the teams of Ampere prize winner Professor Bernhard Bluemich at RWTH Aachen University, and Gunther Laukien prize winner Paul Callaghan at Massey

University and Victoria University of Wellington led to the exceptional technology found at the core of Magritek's products. Magritek has offices in Germany, USA and New Zealand, as well as a worldwide network of partners to help support its customers.

80 MHz Benchtop NMR Spectroscopy

Never Wait for Your NMR Spectra

80 MHz Spinsolve yields high quality spectra in your lab & ensures immediate NMR results.
